DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to a method of producing a genetically modified plant comprising contacting a plant cell with a vector containing an exogenous nucleic acid sequence comprising at least one structural gene encoding a BAS1 polypeptide, a genetically modified plant comprising an exogenous nucleic acid sequence encoding a BAS1 polypeptide, and a seed, classified in class 800, subclass 290, for example.
- II. Claims 12, 15 and 21, drawn to a genetically modified plant comprising at least one regulatory sequence that modifies expression of an endogenous bas1 gene, classified in class 800, subclass 298, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. The plants of inventions I and II are genetically modified with different kinds of nucleic acid sequences. The plant of invention I has dwarf adult stature as a consequence of being genetically modified with an exogenous nucleic acid sequence comprising at least one structural gene encoding a BAS1 polypeptide, whereas the plant of invention II has dwarf adult stature as a consequence of being genetically modified with at least one regulatory sequence that modifies expression of an endogenous bas1 gene.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter, and the requirement for different areas of search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
